

HCD-H66/H70/H77/H1200/H1400

SERVICE MANUAL

HCD-H66, HCD-H70, HCD-H77, HCD-H1200 and HCD-H1400 are the tuner, deck, CD and amplifier section in FH-B66CD, FH-B70CD, FH-B77CD, MHC-1200 and MHC-1400 respectively.

Dolby noise reduction manufactured under license from Dolby Laboratories Licensing Corporation.
"DOLBY" and the double-D symbol  are trademarks of Dolby Laboratories Licensing Corporation.

SPECIFICATIONS

Tuner Section

System	FM stereo, FM/AM superheterodyne tuner
FM tuner section	
Tuning range	87.5–108MHz
Antenna	Telescopic antenna (HCD-H66/H70/H77) FM lead antenna (HCD-H1200/H1400)
Antenna terminals	75 ohms unbalanced
Intermediate frequency	10.7MHz
AM tuner section	
Tuning range	For AEP, UK, G model MW: 531–1,602kHz LW: 153–279kHz For IT model MW: 522–1,611kHz LW: 144–288kHz For E, EA, AUS model MW: 531–1,602kHz SW: 5.95–17.9MHz
Antenna	AM loop antenna, External antenna terminals
Intermediate frequency	450kHz

Amplifier Section

Continuous RMS power output	20+20 watts (6 ohms at 1kHz, 5% THD) (HCD-H66/H1200) 30+30 watts (6 ohms at 1kHz, 5% THD) (HCD-H70/H77/H1400)
-----------------------------	--

CD Section	Model Name Using Similar Mechanism		HCD-H7/H1500
	CD Mechanism Name		CDM13A-5BD3
	Base Unit Name		BU-5BD3
DECK Section	Model Name Using Similar Mechanism		HCD-H7/H1500
	Tape Transport Mechanism Type	DECK A	TCM-170RA1
		DECK B	TCM-170RB7

Peak music power output (for HCD-H70)	280 watts (6 ohms)
Inputs	MIX MIC (minijack) : sensitivity 1mV, impedance 600 ohms For HCD-H66/H77/ H1200/H1400 PHONO (phono jacks): sensitivity 5 mV, impedance 47 kilohms For HCD-H70 VIDEO/AUX (phono jacks): sensitivity 450mV, impedance 50 kilohms
Outputs	HEADPHONES (stereo minijack): accepts headphones of 8 ohms or more. SPEAKER: accepts speakers of 6 to 16 ohms.

COMPACT DISC DECK RECEIVER
SONY

Compact Disc Player Section

System	Compact disc digital audio system
Laser	Semiconductor laser ($\lambda = 780\text{nm}$) Emission duration : continuous
Laser output	Max. $44.6\mu\text{W}^*$ *This output is the value measured at distance of about 200 mm from the objective lens surface on the Optical Pick-up Block.

Cassette Deck Section

Recording system	4-track 2-channel stereo
Frequency response (DOLBY NR OFF)	40–13,000Hz ($\pm 3\text{dB}$), using TYPE I cassette (Sony HF-S) 40–14,000Hz ($\pm 3\text{dB}$), using TYPE II cassette
Wow and flutter	0.1% WRMS $\pm 0.3\%$ (DIN)

General

Power requirements	AEP model 220–230V AC, 50/60Hz UK model: 240V AC, 50Hz G, IT model: 220–230V AC, 50Hz E, EA, AUS model: 110–120V or 220–240V AC adjustable, 50/60Hz
Power consumption	Except for UK model : 90 watts UK model: 160 watts
Dimensions	Approx. $615 \times 285 \times 260\text{mm}$ (w/h/d) ($24\frac{1}{4} \times 11\frac{1}{4} \times 10\frac{1}{4}$ inches) incl. projecting parts and controls
Weight	Approx. 11.6kg (25 lb 9 oz)
Supplied accessories	Remote commander (1) Sony SUM-3 (NS) batteries (2) AM loop antenna (1) FM lead antenna (1) (HCD-H1200/H1400)

Design and specifications subject to change without notice.

Note: G : Germany model
IT : Italian model
EA : Saudi Arabia model
AUS: Australian model

For HCD-H66/H77/H1200/H1400

This appliance is classified as a CLASS 1 LASER product.
The CLASS 1 LASER PRODUCT label is located on the rear exterior.

SECTION 1 SERVICING NOTES

MODEL IDENTIFICATION

— Specification Labels —

IT model: FH-B66CD
 IT model: FH-B77CD
 AEP, G model: HCD-H66
 E, EA, AUS model: HCD-H70
 AEP, G model: HCD-H77
 AEP, UK model: HCD-H1200
 AEP model: HCD-H1400

AEP model: AC: 220–230V~50/60Hz
 UK model: AC: 240V~50Hz
 G, IT model: AC: 220–230V~50Hz
 E, EA, AUS model: AC: 110–120/220–240V~50/60Hz 90W

On operating voltage

Before operating the stereo system, check that the operating voltage of your system is identical with the voltage of your local power supply. **A**

AEP model	220–230V AC, 50/60Hz
UK model	240V AC, 50Hz
G, IT model	220–230V AC, 50Hz
E, EA, AUS model	110–120, 220–240V AC adjustable, 50/60Hz

On operation

- If the system do not operate due to power noise, press the system reset button at the rear. The system will resume operation. **B**
 At this time, the system returns to the factory-set mode. Please set the clock, timer, or store stations again.

LASER DIODE AND FOCUS SERCH OPERATION CHECK

1. Make POWER switch on with no disc inserted and disc table closed.
2. Confirm that the following operation is performed while observing the objective lens.

- Confirm that laser beam is spread.
- Up and down motion of the objective lens. (3 times)

NOTES ON HANDLING THE OPTICAL PICK-UP BLOCK OR BASE UNIT

The laser diode in the optical pick-up block may suffer electrostatic break-down because of the potential difference generated by the charged electrostatic load, etc. on clothing and the human body.

During repair, pay attention to electrostatic break-down and also use the procedure in the printed matter which is included in the repair parts.

The flexible board is easily damaged and should be handled with care.

NOTES ON LASER DIODE EMISSION CHECK

The laser beam on this model is concentrated so as to be focused on the disc reflective surface by the objective lens in the optical pick-up block. Therefore, when checking the laser diode emission, observe from more than 30 cm away from the objective lens.

HOW TO OPEN THE DISC TRAY WHEN POWER SWITCH TURNS OFF

- (1) Insert to ① for tapering driver, etc., and turn in the direction of arrow OFF. (Disc tray open)
- (2) Tray as come out little of front panel, pull out in the direction of arrow ② by hand.

PROTECTION OF EYES FROM LASER BEAM DURING SERVICING

This set employs a laser. Therefore, be sure to follow carefully the instructions below when servicing.

CAUTION

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

1. Laser Diode Properties

- Material: GaAlAs
 - Wavelength: 780 nm
 - Emission Duration: continuous
 - Laser Output Power: less than 44.6 μ W*
- * This output is the value measured at a distance of 200 mm from the objective lens surface on the Optical Pick-up Block.

2. During service, do not take the Optical Pick-up Block apart, and do not adjust the APC circuit. If there is a breakdown in the APC circuit (including laser diode), replace the entire Optical Pick-up Block (including APC board).

BESKYTTELSE AF ØJNE MOD LASERSTRÅLING UNDER SERVICE

I dette apparat anvendes laserlys. Derfor skal nedenstående instruktioner nøje følges under service.

Følg iøvrigt instruktionerne i servicemanualen.

ADVARSEL!!

Under service må øjnene ikke komme nær objektiv-linsen på den optiske pick-up enhed. I tilfælde af at det er nødvendigt at kontrollere udsendelsen af laserlys, skal det ske i en afstand af mere end 25 cm fra den optiske pick-up.

1. Laser-dioode data

- Materiale: GaAlAs
 - Bølgelængde: 780 nm
 - Udstråling: Kontinuerlig
 - Laseroutput: Max. 0,4 mW*
- * Målt i 1,6 mm afstand fra overfladen af objektiv-linsen på den optiske pick-up enhed.
- Klassifikation: Klasse IIIb.

2. Adskil aldrig den optiske pick-up enhed under service, og juster ikke APC kredsløbet (Automatic Power Control). Hvis APC kredsløbet (incl. laser-dioden) bryder ned, skal hele den optiske pick-up enhed (incl. APC printkortet) udskiftes.

LASER ADVARSEL MÆRKNING

Følgende mærkning findes indvendig i apparatet:

1. Advarsel Mærkning

VAROITUS: Laite sisältää, laserdiodin, joka lähettää (näkyvätöntä) silmille vaarallista lasersäteilyä.

2-1. PARTS IDENTIFICATIONS

Tuner Section **A**

- 1 TIMER CONTROL button
- 2 SLEEP timer button
- 3 Display window
- 4 Telescopic antenna (HCD-H66/H70/H77)
- 5 AUTO tuning button

- 19 VOL (volume) +/- controls
- 20 DBFB (Dynamic Bass Feedback) button
- 21 SURROUND (simulated surround) button

2-2. TUNER SECTION

Clock Setting

Setting the Clock

Example: Set to 9:25 in the morning.

When the AC power cord is connected, the display shows:

0:00 for HCD-H66/H77/H1200/H1400
AM 0:00 for HCD-H70.

- 1 Press **CLOCK SET**.
- 2 Set the hour with **PRESET/TIMER +/-** buttons
- 3 Press **NEXT**.
- 4 Set the minute with **PRESET/TIMER +/-** buttons.
- 5 Press **NEXT**.
The clock starts operating.

Information on the time

HCD-H66/H77/H1200/H1400 shows the time in 24-hour cycle.

HCD-H70 shows the time in 12-hour cycle.

When a power interruption occurs

The power is backed up for approximately 1 day. If the power is recovered within 1 day, there is no need to reset the clock and timer. If it is longer than 5 minutes, both the clock and timer settings are erased, and "0:00" will flash on the display.

To check the present time while using the system

Press **CLOCK DISPLAY**.

The time display disappears after a few seconds.

Radio

The automatic tuning allows you to receive stations whose signal is strong enough. When the signal is too weak, use the manual tuning.

Tuning in Automatically

- 1 Press **TUNER**.
- 2 Press **BAND** repeatedly until the desired band appears.
As you press **BAND**, the band changes as follows:
HCD-H66/H77/H1200/H1400:
FM → MW → LW
HCD-H70:
FM → SW → MW
- 3 Press **AUTO**.
Make sure that **AUTO** appears in the display.
- 4 Select the station with **TUNING +** or **-**.

Tuning in Manually

- 1 Press **TUNER**.
- 2 Select band by pressing **BAND**.
- 3 Press **AUTO** so that **AUTO** disappears from the display.
- 4 Select the station with **TUNING +** or **-**.

A total of 30 stations can be stored in any desired sequence, so that you can tune in the stored station directly by entering the memory page and number.

Storing Stations

- 1 Tune in the desired station.
- 2 Press **MEMORY**.
MEMORY appears for several second.
- 3 While **MEMORY** is on, press **SHIFT** to select the memory page (A, B or C).
The memory pages (A, B or C) can be classified according to the music category, station band, etc.
- 4 While **MEMORY** is on, press **PRESET/TIMER + or -** to select the number (1 to 10).
- 5 Press **ENTER**.
MEMORY disappears, and the station is stored.
- 6 Repeat 1 to 5 for each stations to be stored.

If you cannot store a station successfully
Press **MEMORY** again so that **MEMORY** appears, and then proceed with the steps 3 to 5 above.
Be sure to operate while **MEMORY** is on (approx. 4 seconds.)

When you have selected the wrong page and number
Press **MEMORY** and then proceed with the above steps.

To Tune in a Preset Station

- 1 Press **SHIFT** to select the memory page.
- 2 Press **PRESET/TIMER + or -** to select the desired number.

To select the number directly (remote commander only) **A (HCD-H70/H77/H1400)**

- 1 Set the CD/TUNER selector to TUNER.

- 2 Press **SHIFT** and the numeric button.

Indicator on the display

TUNED: Appears when a station of sufficient signal strength is tuned in.

STEREO: Appears when an FM stereo program of sufficient signal strength is received.

Antenna adjustment **B**

For FM reception, adjust the length and direction of the telescopic antenna (HCD-H66/H70/H77)

For MW, LW, and SW reception, find the best location of the AM loop antenna.

Can a previously stored station be erased?

No. Erasing only is not possible, but storing a new station erases the previous one.

Important

The stored stations remain for approximately 1 week even if no power is supplied (e.g. the power cord is disconnected, etc.). If they are erased, store the stations again.

A (HCD-H70/H77/H1400)

2-3. AMPLIFIER SECTION

Audio Adjustment

Volume Adjustment

Turn VOLUME **A** clockwise to increase the sound level, or counterclockwise to decrease it.
(Or press VOL + or - on the supplied remote commander.) (HCD-H70/H77/H1400)

Sound Quality Adjustment

To reinforce bass

Press DBFB **B**
The lower the sound level is, the more the bass is emphasized.

To adjust sound quality to your preference

Adjust the graphic equalizer controls **C**

- 100 Hz: Boost or cut heavy bass.
- 400 Hz: Adjust the power, spaciousness and warmth of the sound.
- 1 kHz: Increase the presence of vocals.
- 4 kHz: Enhance the brightness of sound, or reduce stridency.
- 12 kHz: Highlight the fine details of instrumental sound.

To activate surround effect for stereo sound

Press S-SUR (simulated surround) **D** during a stereo sound reproduction. This creates the atmosphere of a movie theater or concert hall.
This function is not effective for a monaural sound.

For personal listening

Connect headphones to HEADPHONES **E**.
No sound comes from the speakers.

2-4. CD SECTION

Disc Playing

Playing the Entire Disc

- 1 Press CD.
- 2 Press \blacktriangle OPEN/CLOSE to open the tray.
- 3 Place the disc with the printed side up.
- 4 Press $\triangleright \parallel$.
The tray closes and play starts.
The display shows **A** the track number, **B** elapsed playing time of the track and **C** track numbers.

Caution on adjusting volume

Do not turn up the volume while listening to the portion with very low level inputs or no audio signals. If you do, the speakers may be damaged when a peak level portion is played.

To stop play

Press \blacksquare .

To stop for a moment during play

Press $\triangleright \parallel$. \parallel appears in the display.
To resume play, press it again.

To stop play and open the tray

Press \blacktriangle OPEN/CLOSE.

To play an 8 cm (3-inch) CD

Place it on the inner circle of the tray. If the disc is provided with an adaptor, first remove it. Do not put a normal CD (12 cm/ 5-inch) on top of an 8 cm (3-inch) CD.

When the TUNER function is selected

The CD player section does not operate.
This prevents interference to radio reception.

Locating a Particular Selection — Automatic Music Sensor (AMS)

The AMS locates the beginning of a selection.
This function works during play or pause.

To locate the beginning of the current or preceding selection **A-1**

Press **⏮** as many times as required.
Keep **⏮** pressed to skip selection.

To locate the beginning of a succeeding selection **A-2**

Press **⏭** as many times as required.
Keep **⏭** pressed to skip selection.

Locating a selection directly (remote commander only) (HCD-H70/H77/H1400)

You can locate a selection directly using the supplied remote commander.

- 1 Set the CD/TUNER selector to CD.
- 2 Press the numeric button for the desired selection.

If the selection number is greater than 12.

Use the >12 and 1 to 10 buttons. 10 functions as the figure 0.

e.g. To play from selection No. 22

Press >12, 2, 2.

To play from selection No. 30

Press >12, 3, 10.

Locating a Particular Point in a Selection

You can locate any particular point in the disc during play.

To search while monitoring the sound

To move forward at high speed **D-1**

Keep **⏭** pressed during play and release at the desired point.

To move backward at high speed **B-2**

Keep **⏮** pressed during play and release at the desired point.

To search quickly

- 1 Press **⏭** to set the unit in pause mode.
- 2 Keep **⏮** or **⏭** pressed.
The search speed increases, but there is no sound. Find the desired point by observing the display.
Press **⏭** again at the desired point.

POWER
→ ON

B **A**

A-1

A-2

B-1

B-2

(HCD-H70/H77/H1400)

Information display

To change the time display, press **TIME** during play.

As you press **TIME**, the display changes to give you the following information.

- A** Elapsed playing time
- B** Remaining time in a selection. If the current selection number is over 20, "----" is displayed.
- C** Remaining time of the disc

When the tray was closed by pressing **⏮** OPEN/CLOSE **D**

The followings appear for approx. 5 seconds.

- a** Last track number
- b** Total play time of the disc
- c** Track numbers

For the discs containing 17 selections or more, up to 16 appear and the rest does not appear.

Notes on handling discs **E**

- To keep the disc clean, handle the disc by its edge. Do not touch the surface. **a**
- Do not stick paper or tape on the disc. **b**
- Do not expose the disc to direct sunlight or heat sources such as hot air duct, nor leave it in a car parked in direct sunlight as there can be a considerable rise in the temperature.
- After playing, store the disc in its case.

D

E

Playing in a Random Order — Shuffle Play

Shuffle play function plays all the selections in a random order.

- 1 Press **△ OPEN/CLOSE** to open the tray.
- 2 Place the disc.
- 3 Press **△ OPEN/CLOSE** to close the tray.
- 4 Press **SHUFFLE**.
SHUFFLE appears.

- 5 Press **▷||**.

To stop playing
Press **■**.

To cancel shuffle play
Press **CONTINUE**.
SHUFFLE disappears, and play continues in normal play mode.

Playing Repeatedly — Repeat Play

To repeat all selections [A]

Press **REPEAT** once during play so that **REPEAT** appears.

To repeat a single selection [B]

Press **REPEAT** twice while playing the desired selection so that **REPEAT 1** appears.

To cancel repeat play [C]

Press **REPEAT** so that neither **REPEAT** nor **REPEAT 1** is on.

Playing in a Desired Order — Program Play

(HCD-H66/H1200)

You can make a program for up to 20 selections in the order you want them to be played.

- 1 Insert the disc.
- 2 Press **PROGRAM**.
PGM appears in the display.
- 3 Press **◀◀** or **▶▶** to display the desired selection.
- 4 Press **PROGRAM**.
- 5 Repeat steps 3 and 4 for the desired selections.
[A] Last programmed selection
[B] Total playing time of selections
[C] Programmed selection numbers

- 6 Press **▷||**.

To stop playing

Press **■**.

To restart the same program play,
press **▷||**.

To resume normal play

Press **CONTINUE**.

The program is erased and the play continues in the normal play mode.

If "----" is displayed

- You have programmed a selection number over 20.
- The total time has exceeded 100 minutes.

Playing in a Desired Order — Program Play

(HCD-H70/H77/H1400)

You can make a program for up to 20 selections in the order you want them to be played.

- 1 Insert the disc.
- 2 Press **PROGRAM**.
PGM appears in the display.
- 3 Press the numeric buttons for the desired selection in the desired order to be programmed.
 - A Last programmed selection
 - B Total playing time of selections
 - C Programmed selection numbers
- 4 Press ►.

To stop playing

Press ■.
To restart the same program play, press ►.

To resume normal play

Press **CONTINUE**.
The program is erased and the play continues in the normal play mode.

If "—" is displayed

- You have programmed a selection number over 20.
- The total time has exceeded 100 minutes.

To check your program (HCD-H70/H77/H1400)

(Remote commander only)

Press **CHECK** on the remote commander

As you press it, the track numbers appear in the order in which they are programmed. At the last selection, "End" appears in the display window.

To add a selection to the end of the program

Follow the same procedures as "Playing in a Desired Order" while the unit is in the stop mode.

You cannot add selections during play.

To erase the entire program

Press ■ once during stop; twice during play.
The program is also erased when you press ▲ to open the tray or turn off the system.

To erase a particular selection in the program (HCD-H70/H77/H1400)

(Remote commander only)

- 1 Press **CHECK** to display the track number to be erased.
- 2 Press **CLEAR**.

To check the remaining time

Press **TIME** once to see the remaining time of the selection being played; twice to see the total remaining time of the programmed selections; once more to return to the initial display.

2-5. DECK SECTION

Tape Playback

Playback Operation

- 1 Press **TAPE**.
TAPE appears in the display.
- 2 Insert the tape.
- 3 Press **<** (for reverse side playback)
or **>** (for front side playback).

How to select the DIRECTION MODE position

To playback one side: Select .
To playback both sides: Select .
The DIRECTION MODE setting is effective for both decks.

To stop playback
Press .

Playing Back Automatically
after Fast Winding
– Auto Play

This function starts playback automatically from the beginning of the side after fast winding.

To start playback from the beginning of the front side:

press **>** while keeping **<<** pressed

To start playback from the beginning of the reverse side:

press **<** while keeping **>>** pressed.

When listening to the cassette recorded
with Dolby noise reduction system*

Set the DOLBY NR switch to ON.

What is the Dolby NR system?

Dolby NR (noise reduction) system reduces tape hiss noise in low-level high-frequency signals. The system boosts these signals in recording and lowers them in playback.

* Dolby noise reduction manufactured under license from Dolby Laboratories Licensing Corporation.
"DOLBY" and the double-D symbol  are trademarks of Dolby Laboratories Licensing Corporation.

1

2

3

Playing Both Decks in
Succession – Relay Play

Relay play always follows the sequence below regardless of where playback starts. When playback of the reverse side of the tape in deck B is completed, the following sequence continues 4 more times.

- 1 Insert recorded cassettes in both decks.
- 2 Set DIRECTION MODE to RELAY.
- 3 Press **>** or **<** on deck A or deck B.

To stop relay play

Press  of the deck playing.

Notes on Cassettes

To protect recording **A**

Break out the tab on the left shoulder of the cassette side of which recording is to be protected.

To re-record the cassette **B**

Cover each slot with plastic tape.

When using a TYPE II (CrO₂) cassette, be careful not to cover the detector slots which are necessary for automatic tape type detection. **C**

Locating the Beginning of a Selection during Playback – Automatic Music Sensor (AMS)

The AMS locates the beginning of a selection by detecting the blank spaces between selections. To assure correct operation of the AMS, there must be a blank of 4 seconds or longer between selections.

- 1 Press \triangleright or \triangleleft to start playback.
- 2 Press AMS/BLK SKIP to illuminate its indicator.
- 3 Press \gg or \ll referring to the following table.

Direction indicator	Side of the cassette being played	Desired selection	
		Next selection	Selection being played
	Front side	\gg	\triangleleft
	Reverse side	\triangleleft	\gg

Skipping a Blank

The deck automatically goes into the fast winding mode when it detects a blank of about 10 seconds or more. Playback resumes when a new selection begins.

Press AMS/BLK SKIP to illuminate its indicator. **A**

To cancel the blank skip function
Press AMS/BLK SKIP again so that the indicator goes off.

1

2

3

A

Recording (Deck B)

Recording Operation

Use only TYPE I (normal) or TYPE II (CrO₂) tapes for recording.

- 1 Insert the tape.
- 2 Select program source with the function selectors and play it. The display shows the selected program source.
- 3 Set DIRECTION MODE. To record one side, set to \Rightarrow . To record both sides, set to \Leftrightarrow .
- 4 Set DOLBY NR. To use the Dolby NR system, set to ON. Otherwise, set to OFF.
- 5 While keeping REC pressed, press \triangleright (for front side recording) or \triangleleft (for reverse side recording). Recording starts.

To stop recording
Press \blacksquare .

Notes

- Even if you set DIRECTION MODE to \Leftrightarrow , recording stops at the end of the reverse side. To record both sides, be sure to start with the front side.
- Graphic equalizer controls are not effective for recording.
- The recording level is fixed and cannot be adjusted manually.

How to start recording precisely

- 1 Press PAUSE after step 4 in "Recording Operation" above.
- 2 While keeping REC pressed, press \triangleright or \triangleleft .
- 3 Press PAUSE again at the desired point.

If whistling noise is heard during recording MW and LW recording (HCD-H66/H77/H1200/H1400)
Slide the ISS (Interference Suppress Switch) at the rear to the position depending on which best reduces the noise.

1

2

3

4

5

CD Recording (Deck B)

CD Recording Operation

- 1 Insert a blank tape in deck B.
- 2 Set **DIRECTION MODE**.
To record one side, set to \Rightarrow .
To record both sides, set to $\Rightarrow \Leftarrow$.
- 3 Set **DOLBY NR**.
To use the Dolby NR system, set to ON.
Otherwise, set to OFF.
- 4 Press **CD** of the function selector.
- 5 Place the disc with the printed side up, and close the tray.
- 6 Press **CD SYNCHRO**.
CD SYNC appears in the display.
The CD player and cassette deck are set in pause mode.

Note

The front side is automatically selected to be recorded in. To record in the reverse side, press \Leftarrow .

- 7 Press **PAUSE** of the cassette deck.
The CD play and recording start simultaneously.

Note

When the tab on the cassette has been removed, the CD SYNCHRO button does not operate.

Is it possible to listen to program sources other than CD during CD recording?

No. If you press another function selector, the CD play stops and the program of the pressed button will be recorded.

Blanks between selections during CD recording

A 3-second blank is automatically inserted between selections.

Is it possible to adjust the sound quality for CD recording?

No. The graphic equalizer does not work.

(HCD-H66/H1200)

If the tape ends in the middle of a selection **A**

The tape is rewound to the beginning of the selection. Then the selection is re-recorded so that it fades out naturally at the end of the tape.

If the recording is to be continued to the reverse side, the selection that faded out on the front side is recorded from its beginning on the reverse side.

A

To record only desired selections

Before pressing CD SYNCHRO, program the desired selections. (See page 36.)

To program for both sides continuously, insert a pause section between the selections for side A and those for side B.

- 1 Program the selections for side A.
- 2 Press \square for CD operation on the remote commander.
The total play time will be reset to 0.
- 3 Program the selections for side B.
- 4 Press CD SYNCHRO.
- 5 Press PAUSE on the cassette deck.
Recording starts.

When the CD play of side A ends, the CD player enters pause mode. When the tape comes to the beginning of side B, the CD play of side B starts and the recording starts automatically.

Important

- Total playing time of the program of each side must be within the length of each side of the tape.
- Up to 20th selection in the disc can be programmed. 21st selection cannot be programmed.

(HCD-H70/H77/H1400)

If the tape ends in the middle of a selection **A**

The tape is rewound to the beginning of the selection. Then the selection is re-recorded so that it fades out naturally at the end of the tape.

If the recording is to be continued to the reverse side, the selection that faded out on the front side is recorded from its beginning on the reverse side.

Programming selections while checking the total playing time – Program Edit

You can adjust the total playing time to the tape duration.

- 1 Press PROGRAM.
"PGM" appears in the display.
- 2 Choose the desired selection to be programmed with **◀◀** or **▶▶** and check the time.
- 3 If satisfactory, go to the next step.
If not, repeat step 2 and choose another selection.
- 4 Press PROGRAM.
- 5 Repeat steps 2 to 4 to program the desired selections for side A.
"A" remains lit.
- 6 Press II on the remote commander.
"P" appears in the display and the total playing time is reset to 0. "B" lights up.
- 7 Repeat steps 2 to 4 to program the desired selections for side B.
- 8 Press CD SYNCHRO and PAUSE on the cassette deck.
The CD play and recording start simultaneously.

When the CD play of side A ends, the CD player enters pause mode. When the tape comes to the beginning of side B, the CD play of side B starts and the recording starts automatically.

Important

- Total playing time of the program of each side must be within the length of each side of the tape
- Up to 20th selection in the disc can be programmed. 21st selection cannot be programmed.

A

Editing the CD for Recording

The CD player automatically edits the selections on a CD according to the tape length.

- 1 Perform 1 to 5 of the CD recording operation, on page 48.
- 2 Press EDIT.
Make sure that EDIT and - - - appear in the display.
- 3 Designate the tape length of one side using **▶▶**, and **◀◀**, or **▶◀** and **◀▶**.
As you press **▶▶** or **◀◀**, the minute display changes as follows:

23 ↔ 27 ↔ 30 ↔ 37 ↔ 45 ↔ - -

As you press **▶◀** or **◀▶**, the seconds increase or decrease by 10. After 50, the seconds show 00 and the minutes increase by 1.

- 4 Press EDIT.
The selections to be recorded are determined automatically. For details, see page 54.
Then the display shows **A** the last selection to be recorded, **B** total playing time, and **C** selections to be recorded.
- 5 For recording both sides, press EDIT again.
- 6 Press CD SYNCHRO.
- 7 Press PAUSE of the cassette deck.
The recording starts.

Note

- Up to 20th selection in the disc can be recorded. 21st selection cannot be recorded.
- Designate the total playing time shorter than the tape length in step 3.

To record desired selections on the front side

Before pressing EDIT, program the desired selection.

How the CD player determines the selections **A**

The CD player selects the selections from the first one in the CD, summing up each playing time. When the total playing time exceeds the specified tape length, the last selection is eliminated. Then, the CD player looks for a selection whose length is within the remaining tape and substitutes it for the eliminated one.

A

Tape Dubbing (from deck A to B)

Dubbing the Whole Tape

- 1 Insert the recorded tape in deck A and the blank tape in deck B.
- 2 Set DIRECTION MODE.
To dub on one side:
To dub on both sides of the tapes with the same length:
To dub on both sides of the tapes with the different length: RELAY
- 3 Press HIGH SPEED.
- 4 Press PAUSE.
High speed dubbing starts.

To stop dubbing

Press on either deck A or B.
The tapes in both decks stop.

Note on DIRECTION MODE setting

Position	Operation
	Dubbing stops at the end of the tape.
	When the tape in one deck comes to its end, it reverses immediately regardless of the tape position of the other deck.
RELAY	When the tape in one deck reaches its end, it stops until the other tape also comes to its end, and then both tapes reverse together.

When dubbing starts from the reverse side in the RELAY mode

At the end of the reverse side, dubbing stops automatically.

Note

During high speed dubbing, only is operative.

1

2

3

4

Editing the Tape

- 1 Press TAPE of the function selector.
- 2 Insert the recorded tape in deck A and the blank tape in deck B.
- 3 Set DIRECTION MODE to or .
- 4 Locate the beginning of the portion to be dubbed on deck A, using or and then stop the tape.
- 5 While keeping REC pressed, press or of deck B.
- 6 Press or of deck A.
Normal speed dubbing starts.

To stop dubbing

Press on both decks.

Is it necessary to set DOLBY NR?

No. The tape in deck B is automatically recorded in the same state as the tape in deck A.

Is it possible to listen to program sources other than tape during dubbing?

During high speed dubbing, yes. Any program source can be selected with the function selectors.
During normal speed dubbing, no. The source changes to that of the function selector pressed and the tape playback cannot be dubbed.

6

Timer-activated Operation

The power can be turned on and off automatically so that you can record a radio program while you are out, or wake up to music, etc.

The preset timer-on and -off time remain until you reset them or the power cord is disconnected.

Before setting the timer

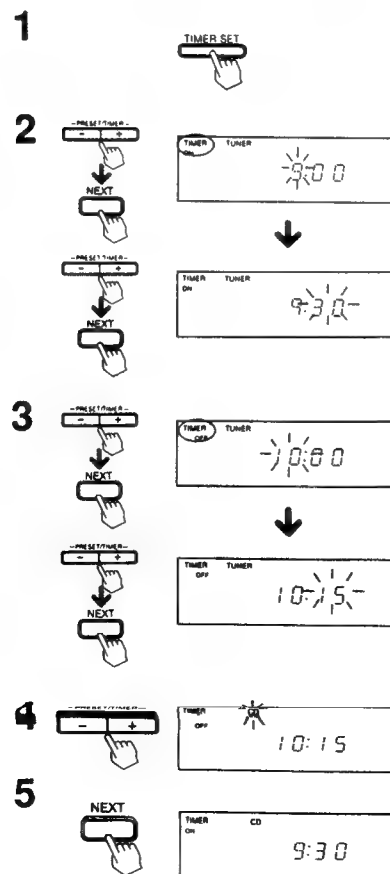

- Make sure the clock is set correctly.
- If you want to record a radio program, be sure to insert a cassette tape long enough.

Timer Setting

The illustrations show an example that the system turns on at 9:30 and off at 10:15.

- 1 Press TIMER SET.**
TIMER ON appears and a figure indicating hour blinks.
- 2 Set the hour and minute of the timer-on time with PRESET/TIMER + or -, and NEXT.**
TIMER OFF appears and a figure indicating hour blinks.
- 3 Set the hour and minute of the timer-off time with PRESET/TIMER + or -, and NEXT.**
The program source blinks.
- 4 Select the program source with PRESET/TIMER + or -.**
As you press + or -, the source changes:
TUNER ↔ TUNER REC ↔ TAPE ↔ CD
- 5 Press NEXT.**
- 6 Prepare for the source, selecting a stored station, inserting the disc or tape.**

- 7 Press POWER to turn off the system.**
Make sure that TIMER is on.
At the timer-on time, the system turns on automatically.

To change the time and program

- 1 Press TIMER SET.**
The timer-on hour blinks.
- 2 Press NEXT until the item to be changed blinks.**
- 3 Press PRESET/TIMER + or - until the desired time or source appears.**
- 4 Press NEXT until TIMER ON time appears.**
The display, then, shows TIMER OFF time, and returns to the previous display.

When you do not want to operate the timer program

Press **TIMER CONTROL** to turn off **TIMER**.
To reactivate the timer, press **TIMER CONTROL** to display **TIMER**.

When the power is already on at the preset time

The function mode will be automatically changed to the preset one, even if you are playing a program of another function. However, when you have preset the **TUNER REC** mode, recording will not start even though the station is tuned in. Be sure to turn the power off before the preset time for tuner recording.

Important

On the recording side of a tape during timer recording

Playback or recording always starts from the front side (the side facing you). To record on the other side, be sure to turn over the tape, otherwise, recording on the front side will be erased.

Sleep Timer Operation

By setting the sleep timer, the system power can be turned off after the preset duration.

Sleep Timer Setting

- 1 Play the desired program source.
- 2 Press SLEEP to select the desired duration in minute.
As you press SLEEP, the indication changes as follows:
90 → 80 → ... 10 → --

To turn off the system before the time of the sleep timer comes

Press POWER.

To check the remaining time of the sleep timer

Press SLEEP once, and the remaining time appears.

The display returns to the previous indication in several seconds.

Microphone Mixing

Mixing Operation A

- 1 Connect the microphone to MIX MIC jack.
- 2 Select program source with the function buttons and play it.
- 3 Sing or speak into the microphone.
- 4 Adjust the total volume.

When the mixing is over

Be sure to disconnect the microphone.

Recording the Sound Mixed with a Source

- 1 Mix the sound as described above.
- 2 Insert a tape in deck B.
- 3 Set deck B to the record mode.

Recording from a Microphone Only

- 1 Press CD.
- 2 Press ■ of the CD player.
- 3 Insert a tape in deck B.
- 4 While keeping REC pressed, press ▷ or ◁ on deck B.
Recording starts.
- 5 Speak or sing into the microphone.

To stop howling (acoustic feedback)
Placing the microphone too close to the speakers may cause howling. Move the microphone away from the speakers or change the direction it faces.

SECTION 3 DISASSEMBLY

Note: Follow the disassembly procedure in the numerical order given.

3-1. CASE

3-2. POWER BLOCK

3-3. MAIN BOARD

3-4. CD MECHANISM BLOCK

3-5. TC MECHANISM BLOCK

SECTION 4 MECHANICAL ADJUSTMENTS

PRECAUTION

- Clean the following parts with a denatured alcohol-moistened swab :

record/playback head	pinch roller
erase head	rubber belt
capstan	idler
- Demagnetize the record/playback head with a head demagnetizer.
(Head demagnetizer do not approach for the erase head.)
- Do not use a magnetized screwdriver for the adjustment.
- After the adjustments, apply suitable locking compound to the parts adjusted.
- The adjustment should be performed with the rated power supply voltage unless otherwise noted.

• Torque Measurement

Torque	Torque meter	Meter reading
Forward	CQ-102C	30 to 60g·cm (0.42 to 0.83oz·inch)
Forward back tension	CQ-102C	1 to 5g·cm (0.014 to 0.069oz·inch)
Reverse	CQ-102RB	30 to 60g·cm (0.42 to 0.83oz·inch)
Reverse back tension	CQ-102RB	1 to 5g·cm (0.014 to 0.069oz·inch)
Forward, Reverse	CQ-201B	100 to 170g·cm (1.39 to 2.36oz·inch)

• Timer Test Mode

When BAND, SHIFT and PRESET/TIMER+ buttons are pressed at the same time the following time test operation is performed. After the operation, it becomes in the system reset mode. Take care that the frequency preset to the tuner is initialized.

- POWER OFF

Record/Playback Head Azimuth Adjustment

DECK A DECK B

Procedure :

- Forward Playback Mode

• Preset Frequency in Restting

When pressing the system reset button (S702) of the rear side of the unit, the following frequency is preset to the tuner part. When the system reset is performed in repairing, be sure to return to the frequency set by the user.

FM	HCD-H66/H77/H1200/H1400 () : Italian model			
	MW		LW	
A1 87.5MHz	A6 531(522)kHz	B1 153(144)kHz		
A2 88.0MHz	A7 603(522)kHz	B2 162kHz		
A3 98.0MHz	A8 999(522)kHz	B3 216kHz		
A4 106.0MHz	A9 1040(522)kHz	B4 270kHz		
A5 108.0MHz	A0 1602(1611)kHz	B5 279(288)kHz		

FM	HCD-H70 MW tuning interval : 9k (10k)			
	MW		SW	
A1 87.5MHz	A6 531(530)kHz	B1 5.95MHz		
A2 88.0MHz	A7 603(620)kHz	B2 7.00MHz		
A3 98.0MHz	A8 999(1050)kHz	B3 12.00MHz		
A4 106.0MHz	A9 1404(1490)kHz	B4 17.00MHz		
A5 108.0MHz	A0 1602(1710)kHz	B5 17.90MHz		

- Turn the adjustment screw for the maximum output levels. If these levels do not match, turn the adjustment screw until both of output levels match together within 1dB.

3. Playback Mode

test tape
P-4-A100
(10kHz, -10dB)

- Change the review playback mode and repeat the steps 1 to 3.
- After the adjustment, lock the adjustment screw with suitable locking compound.

Adjustment Location :

—record/playback head (deck A and B)

Tape Speed Adjustment DECK A DECK B

Procedure :

- Perform high speed adjustment before normal speed adjustment.

Mode : playback

test tape
WS-48A
(3kHz, 0dB)

Speed	Test pin (TP601)	Deck	Adjustment	Frequency counter
*High	short	A	M1 (H)	5,960 to 6,040Hz
		B	M2 (H)	
Normal	open	A	M1 (L)	2,980 to 3,020Hz
		B	M2 (L)	

* Continue to press HIGH SPEED DUBBING switch (S312) in playback mode: High speed playback.

Frequency difference between the beginning and the end of the tape should be within $\pm 1.5\%$.

Adjustment Location : motors (M1 (deck A), M2 (deck B))

Playback Level Adjustment DECK A DECK B

Procedure :

Mode : playback

test tape
P-4-L300
(315Hz, 0dB)

Deck A is RV41A (L-CH) and RV61A (R-CH), deck B is RV41B (L-CH) and RV61B (R-CH) so that adjustment within adjustment level as follows.

Adjustment Level :

LINE OUT level : $-6 \pm 0.5\text{dB}$ (0.37 to 0.41V)

Level Difference between Channels : within 1dB

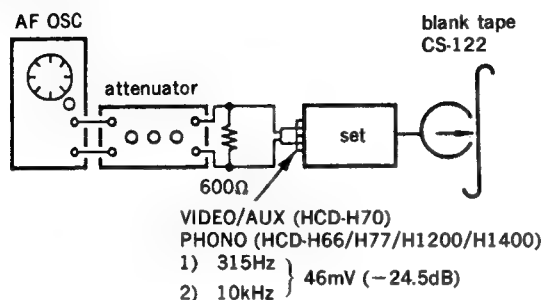

Confirm the DOLBY OUT level does not change in playback mode while changing the mode from playback to stop several times.

Adjustment Location : MD-A and MD-B boards

Record Bias Adjustment **DECK B**

Procedure:

1. record mode

2. playback mode

Confirm playback the signal recorded in step 1 become adjustment level as follows.

If these levels do not adjustment level, adjustment the RV42B (deck A) and RV62B (deck B) to repeat step 1 and 2.

Adjustment level: Playback output of 315Hz to playback output of 10kHz: -0.5dB to 0.5dB

Adjustment Location: MD-B board

Record Level Adjustment **DECK B**

Procedure:

1. record mode

2. playback mode

Confirm playback the signal recorded in step become adjustment level as follows.

If these levels do not adjustment level, adjustment the RV701 (deck A) and RV751 (deck B) to repeat step 1 and 2.

Adjustment Level:

LINE OUT level: $-6 \pm 0.5\text{dB}$ (0.37 to 0.41V)

Adjustment Location: main board

Adjustment Location:

mechanism deck—rear side—

main board—component side—

TUNER SECTION

FM SECTION ADJUSTMENTS

Setting :

Carrier frequency: 98MHz
 Modulation: 1kHz, 75kHz deviation (HCD-H70)
 1kHz, 40kHz deviation (HCD-H66/H77/H1200/H1400)

FM Discriminator Alignment (NULL Check)

Band : FM

Procedure :

1. Supply a 1mV (60dBμ) 98MHz signal from the ANTENNA terminal.
2. Tune the set to 98MHz.
3. Adjust IFT82 for 0V reading on the VOM.

Note : FM tuned indication lighting level adjustment should be made after FM discriminator alignment.

FM Tuned Indication Lighting Level Adjustment

Band : FM

Procedure :

1. Supply a 32μV (30dBμ) 98 MHz signal from the ANTENNA terminal.
2. Tune the set to 98MHz.
3. Adjust RV81 so that the **TUNED** light up.

Adjustment Location : main board

AM SECTION ADJUSTMENTS

Setting :

MW Tuned Indication Lighting Level Adjustment

Band : MW

Procedure :

1. Set loop antenna A so that the loop antenna, B input level becomes 0.45mV (53dBμ)
2. Tune the set to 1,404kHz.
3. Adjust the RV82 so that the **TUNED** light up.

SW OSC Voltage Adjustment (HCD-H70)

Band : SW

Procedure :

1. Connect the VOM to TP (OSC).
2. Tune the set to 5.95MHz.
3. Adjust T2 for 0.9 to 1.1V reading on the VOM.
4. Tune the set to 17.90MHz.
5. Adjust CT22 for 8.3 to 8.7V reading on the VOM.

SW Tracking Adjustment (HCD-H70)

Band : SW

Procedure :

1. Connect the VOM to speaker terminal.
2. Adjust for a maximum reading on VOM.

Signal generator and Set frequency	Adjustment part

CT21, T1

Note :

- ### S Curve Check

1. Connect oscilloscope to test point TP (FEO) on BD board.
2. Connect between test point TP (FES) and TP (VC) by lead wire.
3. Turned Power switch on and actuate the focus serch. (actuate the focus serch when disc table is moving in and out.)
4. Check the oscilloscope waveform (S curve) is symmetrical between A and B. And confirm peak to peak level within $3 \pm 1V_{p-p}$.

- Note :** • Try to measure several times to make sure that the ratio of A : B or B : A is more than 10 : 7.

RF Level Check

1. Connect oscilloscope to test point TP (RF) on BD board.
2. Turn Power switch on.
3. Put disc (YEDS-18) in and playback.
4. Confirm that oscilloscope waveform is clear and check RF signal level is correct or not.

Clear RF signal waveform means that the shape “◇” can be clearly distinguished at the center of the waveform.

1. Connect test point TP (ADJ) to ground and TP (TES) to TP (VC) with lead wire.
2. Connect oscilloscope to test point TP (TEO) on BD board.
3. Turn Power switch on.
4. Put disc (YEDS-18) in and playback.
5. Confirm that the oscilloscope waveform is symmetrical on the top and bottom in relation to 0V, and check this level.

- Adjustment
BD board)

Procedure :

-

- ### Focus/Tracking Gain

Therefore, do not perform, this adjustment.

Please note that it should be fixed to mechanical center position when you moved and do not know original position.

RF PLL Free-run Frequency Check

Procedure :

1. Connect frequency counter to test point (PCK) with lead wire.

2. Turn Power switch on.
3. Confirm that reading on frequency counter is 4.3218MHz.

Focus/Tracking Gain

This gain has a margin, so even if it is slightly off. There is no problem.

Therefore, do not perform, this adjustment.

Please note that it should be fixed to mechanical center position when you moved and do not know original position.

• JC51 TC9217P

The block diagram illustrates the internal circuitry of the Philips FM7300 radio receiver, organized around a central IC with 28 pins. The pins are labeled as follows:

- Pin 1:** FM-IN
- Pin 2:** VCC
- Pin 3:** FM-AFC
- Pin 4:** FM-DET-OUT
- Pin 5:** AGC
- Pin 6:** AM-IF
- Pin 7:** GND
- Pin 8:** FM-DET-OUT
- Pin 9:** ST-LED
- Pin 10:** TU-LED
- Pin 11:** TU-ST-RESET
- Pin 12:** IF-BUFF
- Pin 13:** AM-FM
- Pin 14:** MUTE
- Pin 15:** AM-SD-ADJ
- Pin 16:** FM-SD-ADJ
- Pin 17:** V-REF
- Pin 18:** AM-OSC
- Pin 19:** AM-RF-IN
- Pin 20:** AM-MIX
- Pin 21:** IF BUFFER
- Pin 22:** AM-IF
- Pin 23:** GND
- Pin 24:** AGC
- Pin 25:** AM-IF
- Pin 26:** AM-DET
- Pin 27:** IF BUFFER
- Pin 28:** AM-IF

The circuit includes the following functional blocks and components:

- FM Section:** FM-IN (Pin 1) → FM IF (Pin 2) → FM DET (Pin 4) → FM-DET-OUT (Pin 5). FM-AFC (Pin 3) is connected to the FM DET.
- AM Section:** AM-RF-IN (Pin 18) → AM MIX (Pin 20) → AM-IF (Pin 24) → AM-DET (Pin 26) → AM-DET-OUT (Pin 27). AM-OSC (Pin 17) and V-REF (Pin 16) are connected to the AM MIX.
- AGC and ALC:** AGC (Pin 6) is connected to the AM MIX and the FM LEVEL DET. ALC (Pin 23) is connected to the FM LEVEL DET.
- FM LEVEL DET and COMP:** FM LEVEL DET (Pin 8) → COMP (Pin 9) → FM-DET-OUT (Pin 10).
- IF and MUTE:** IF BUFFER (Pin 21) → IF-BUFF (Pin 12) → MUTE (Pin 14).
- Decoder and Stereo SW:** MUTE (Pin 14) → DECODER (Pin 13) → STEREO SW (Pin 15).
- LEDs and Pilot Det:** ST-LED (Pin 9) and TU-LED (Pin 10) are connected to the DECODER. The PILOT DET (Pin 11) is connected to the DECODER and the LED DRIVE (Pin 14).
- Frequency Synthesis:** P.D. (Pin 12) → VCO (Pin 13) → FF 38KHz (Pin 14) → FF 19KHz / 20° (Pin 15) → FF 19KHz / 20° (Pin 16).
- Other Components:** FM-SD-ADJ (Pin 16), AM-SD-ADJ (Pin 17), and MUTE (Pin 14) are also connected to the LED DRIVE.

The block diagram illustrates the digital signal processing system for the 1000 Hz channel. The system is organized into several functional blocks and interconnected by a network of lines labeled 1 through 12.

- Timing and Control:** A **TIMING GENERATOR** (block 1) provides clock signals (lines 1, 2, 3, 4) to the **PARALLEL → SERIAL CONVERTER**, **RAM FOR THIRD-ORDER FIR**, **RAM FOR 11TH-ORDER FIR**, **NOISE SHAPER & ARITHMETIC CIRCUIT (ROUND OFF?)**, and **SERIAL → PARALLEL CONVERTER**.
- Input and Conversion:** The **PARALLEL → SERIAL CONVERTER** (block 2) receives input from line 11 and outputs to line 12. Its output passes through a **SWITCH** (block 3) and a **BUFFER RAM** (block 4) before entering the **RAM FOR THIRD-ORDER FIR** (block 5).
- FIR Filtering:** The **RAM FOR THIRD-ORDER FIR** (block 5) outputs to a **LATCH** (block 6). The **RAM FOR 11TH-ORDER FIR** (block 7) outputs to another **LATCH** (block 8). These two latched signals are combined in an **ADDER** (block 9), followed by another **LATCH** (block 10).
- Attenuation and Calculation:** The output of the adder-latch stage is fed into an **ATTENUATOR (8dBIT COUNTER)** (block 11). The output of the attenuator is then processed by a **CALCULATION ROM** (block 12).
- Arithmetic and Limiting:** The output of the calculation ROM is fed into an **MPY** (Multiplier) block (block 13). The output of the multiplier is latched (block 14) and then added (block 15) to the output of the **RAM FOR 11TH-ORDER FIR** (block 7). This sum is then latched (block 16) and passed through a **LIMITER** (block 17).
- Final Conversion:** The output of the limiter is fed into the **NOISE SHAPER & ARITHMETIC CIRCUIT (ROUND OFF?)** (block 18). The output of this circuit is then converted back to parallel by the **SERIAL → PARALLEL CONVERTER** (block 19), which outputs to lines 9, 10, 11, and 12.

[illegible]

The diagram shows a 5-stage shift register implemented with five 7414 hex inverters. The stages are labeled N1, F1, N2, F2, N3, F3, N4, F4, N5, and F5. The output of the final stage (F5, pin 10) is connected back to the input of the first stage (N1, pin 1) through a feedback loop consisting of two resistors and an inverter (pins 11, 12, 13, 14). The circuit is powered by Vcc (pin 14) and GND (pin 16). A BIAS line (pin 15) is connected to the input of the second stage (N2, pin 3). The output of the second stage (F2, pin 4) is connected to the input of the third stage (N3, pin 5). The output of the third stage (F3, pin 6) is connected to the input of the fourth stage (N4, pin 7). The output of the fourth stage (F4, pin 8) is connected to the input of the fifth stage (N5, pin 9). The output of the fifth stage (F5, pin 10) is connected to the input of the first stage (N1, pin 1) through a feedback loop consisting of two resistors and an inverter (pins 11, 12, 13, 14). The circuit is powered by Vcc (pin 14) and GND (pin 16). A BIAS line (pin 15) is connected to the input of the second stage (N2, pin 3). The output of the second stage (F2, pin 4) is connected to the input of the third stage (N3, pin 5). The output of the third stage (F3, pin 6) is connected to the input of the fourth stage (N4, pin 7). The output of the fourth stage (F4, pin 8) is connected to the input of the fifth stage (N5, pin 9). The output of the fifth stage (F5, pin 10) is connected to the input of the first stage (N1, pin 1) through a feedback loop consisting of two resistors and an inverter (pins 11, 12, 13, 14).

The block diagram illustrates a stereo amplifier system with the following components and connections:

- Power Supply:** Pin 1 is Vcc and Pin 4 is GND. A power symbol is shown between them.
- Control and Reference:** Pin 5 is labeled REG (Regulator) and Pin 6 is labeled REFERENCE. Both are connected to the Vcc line.
- Input Stage:** Pin 3 is IN 1 and Pin 6 is IN 2. Each input is connected to an INPUT AMP block.
- Control Block:** A central CONTROL block receives inputs from the two INPUT AMPs and the REFERENCE pin.
- Output Stage:** The CONTROL block drives two POWER AMP blocks. The outputs are labeled OUT 2 (Pin 2) and OUT 1 (Pin 7).

The diagram shows a 2D grid graph with 16 nodes arranged in two rows of eight. The top row nodes are labeled 16, 15, 14, 13, 12, 11, 10, 9 from left to right. The bottom row nodes are labeled 1, 2, 3, 4, 5, 6, 7, 8 from left to right. A path is highlighted with solid lines, starting at node 1, moving up to node 15, then right to node 14, down to node 4, right to node 5, up to node 12, and finally right to node 16. Dashed lines represent other possible edges in the grid.

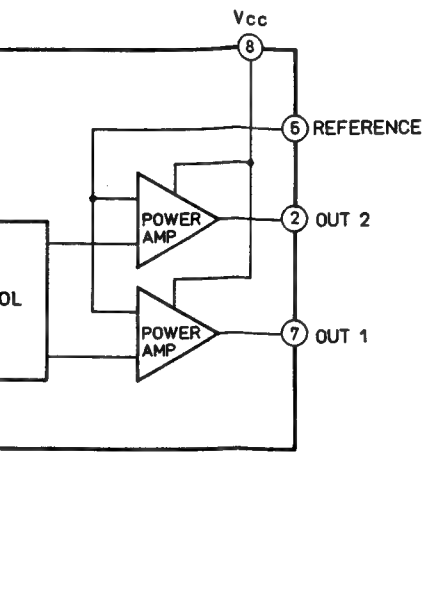

The block diagram illustrates the internal architecture of the EFM DEMODULATOR. Key components include:

- EFM DEMODULATOR:** The central processing unit, connected to various input and output pins.
- ANALOG CLV, DIGITAL CLV:** Receives control signals (FSW, MON, MOP, MDS) and provides feedback to the demodulator.
- ANALOG PLL, DIGITAL PLL:** Receives control signals (VCOO, VCOI, TEST, PDO) and provides feedback to the demodulator.
- VARIABLE PITCH CONTROL:** Receives control signals (C16M, C4M) and provides feedback to the demodulator.
- CLK GENERATOR:** Receives control signals (FSTT, XTSL, XTAO) and provides feedback to the demodulator.
- DATA:** A central data bus connecting the demodulator to the RAM and the DIGITAL AUDIO INTERFACE.
- RAM:** Receives data from the demodulator and provides feedback to the digital audio interface.
- ERROR CODE CORRECTOR:** Receives data from the RAM and provides feedback to the digital audio interface.
- DIGITAL AUDIO INTERFACE, ADDRESS GENERATOR:** Receives data from the RAM and provides feedback to the demodulator.
- ASYMMETRY CORRECTOR:** Receives control signals (BIAS, ASYI, ASYO, ASYE) and provides feedback to the demodulator.

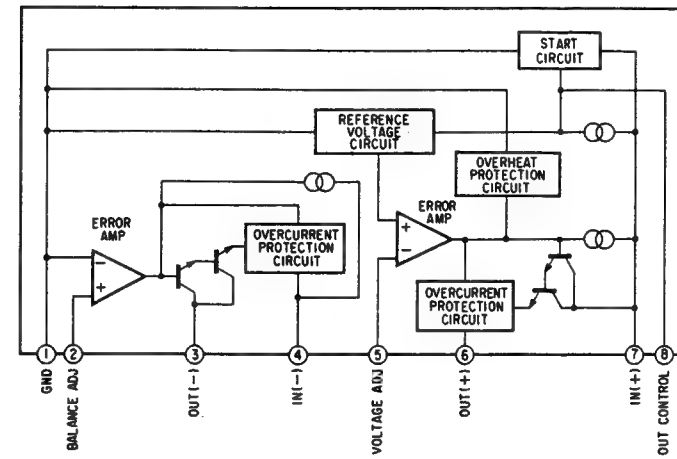

The diagram also shows the connection of various pins to the demodulator, including:

- Inputs:** MIRR, CLKO, XLO, DATO, CNIN, SEIN, CLOCK, VDD, XLAT, DATA, XST, SENS, MUTE, SOCK, SGSO, BACK.
- Outputs:** SBSO, SCOR, WFCN, EMPH, DOUT, MD2, C16M, C4M, FSTT, XTSL, XTAO, VSS, APTL, APTR, DA01, DA02, DA03, DA04, DA05, DA06, DA07, DA08, DA09.

[TEST MODE]

When making pin ③ low (connect TP1 to ground with jumper wire), following function operates.

1. Sourec monitor
Release the line mute while recording.

2. High speed p
On recording
3. Record mem
Using DIREC

2. High speed playback
On recording, while pressing HIGH SPEED (DUBBING) button, high speed playback operates.
3. Record memory stop
Using DIRECTION MODE switch ⇄, returns to the recording start point and stops or plays.

54	CLK	O	Serial data output for CXD2500Q
55	DATA	O	Serial data output for CXD2500Q
56	Not Used	I	GND
57	ADJ	I	Test mode input, "L" is GFS no check.
58	GFS	I	GFS OK/NO Good input
59	FOK	I	Focus OK NO Good input
60	Not Used	O	OPEN
61	Not Used	O	OPEN
62	LODOUT	O	Disc tray loading-out output
63	LODIN	O	Disc tray loading-in output
64	VSS	I	GND

SECTION 7 EXPLODED VIEWS

NOTE:

- The mechanical parts with no reference number in the exploded views are not supplied.
- Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

- XX, -X mean standardized parts, so they may have some differences from the original one.

- Color Indication of Appearance Parts
Example:

KNOB, BALANCE (WHITE)...(RED)

Parts Color Cabinet's Color

- G : Germany model
- IT : Italian model
- EA : Saudi Arabia model
- AUS: Australian model

- Hardware (# mark) list is given in the last of this parts list.

The components identified by mark  or dotted line with mark  are critical for safety. Replace only with part number specified.

SECTION 8 ELECTRICAL PARTS LIST

NOTE:

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- -XX, -X mean standardized parts, so they may have some differences from the original one.
- CAPACITORS
uF: μ F

- RESISTORS
All resistors are in ohms
METAL: Metal-film resistor
METAL OXIDE: Metal Oxide-film resistor
F: nonflammable
- COILS
uH: μ H
- SEMICONDUCTORS
In each case, u: μ , for example:
uA...: μ A..., uPA...: μ PA...,
uPB...: μ PB..., uPC...: μ PC...,
uPD...: μ PD...

The components identified by mark Δ or dotted line with mark Δ are critical for safety. Replace only with part number specified.

When indicating parts by reference number, please include the board name.

- G : Germany model
- IT : Italian model
- EA : Saudi Arabia model
- AUS: Australian model
